- The following two lists contain the names of Polish merchant vessels. These lists have been compiled in order to give an idea of the number of Polish Merchant Marine vessels and their tonnage as of 30 September 1952. List I contains the names of vessels which were known to be in use in the Baltic Sea as of 30 September 1952. List II contains the names of ships which were observed leaving the Baltic Sea prior to 30 September 1952.
- List I includes the names of seven newly-constructed Polish vessels of approximately 2,900 gross tons. These vessels are not yet in use, probably because their main machinery has not yet been completely installed. List I includes the names of 53 vessels of approximately 93,595 gross tons. List II includes the names of 16 vessels of approximately 63,254 gross tons which are used for traffic between the Baltic Sea and the Continent. Also included in this list are 13 vessels which are engaged in traffic between Poland and the Far East or Mediterranean. In all, this list contains the names of 39 vessels of 181,756 gross tons. The two lists contain the names of 94 vessels and a total of 275,351 gross tons.
- the present report shows that the Polish Merchant Marine has increased by four ships, but that total gross tonnage has declined by 986 gross tons. The present report does not include figures on specialized vessels.

## LIST I

## POLISH MERCHANT-MARINE VESSELS IN USE IN THE BALTIC SEA

as of 30 September 1952

TYPE	NAME	GROSS TONNAGE	USE
S.S.	ANNA	800	Passenger ship in coastal traffic; 350 passengers.
